ACADEMICS

•National Taiwan University

July 2021-Present

Information Management

GPA: 4.26 (Last Semester)

Key Courses: Text Mining, Data Mining, Machine Learning, Deep Learning, Computer Vision, Web Programming, Operation Research, Social Media Analysis, Entrepreneurship, etc

•C.P. Wei's Lab and H.W. Lee's Lab

June 2024-Present

Research Assistant

Research Focus: Social Media Analysis, Deep Learning, Epidemic Modeling, Social Science, Complex Systems

EXPERIENCE

•Kardomo.com

Full-stack Development, DevOps, UI/UX

Co-founder & Technical Lead

Jan. 2024 - Present

- Leading end-to-end development of a K-pop marketplace, managing full-stack implementation and infrastructure setup.
- Spearheading engineering efforts (backend, frontend, infrastructure) within the NTU Garage incubation program.

•Chunghwa Telecom Laboratories (Work)

UI/UX, Frontend, Backend, Database, Devops

Full Stack Developer Intern

Jul. 2023 - Aug. 2023

- Developed a backend system for dining reservations, managing data for 100+ branches and processing thousands of entries.
- Integrated modern UI/UX, DevOps practices, and full-stack technologies.

•PDOGS Judge (School)

Docker, GitLab CI/CD, Jenkins, Nomad

DevOps Developer

Jul. 2023 - Aug. 2023

- Implemented CI/CD pipelines using Docker, GitLab CI/CD, and Jenkins for the PDOGS school judging system, improving deployment efficiency.
- Designed backend and judge core CI/CD pipelines; utilized Nomad for deployment orchestration.

•NTU ArtFest Riddle City Project Manager and Developer (Other)

Next.js, PostgreSQL, SupaBase, SEO

Full-Stack Developer and Project Manager

Feb. 2024 - Mar. 2024

- Developed and deployed an interactive game platform using Next.js and PostgreSQL.
- Attracted over 300 players within one week of launch.

WORKS

•Mono App

Apr. 2024

A 30-day challenge iOS app for goal tracking. Available on the App Store.

- Developed and launched a habit-tracking iOS app, achieving 1k+ downloads and 200 DAUs within the first week.
- Solely managed backend infrastructure (VPS setup, deployment) and maintained a 4.5+ App Store rating.

•SamGPT

Mar. 2024

An AI-powered English tutor leveraging advanced language models.

- Designed an AI pipeline using ReAct and Chain-of-Thought reasoning, achieving a 95%+ correct response rate.
- Engineered the full-stack application (Next.js, APIs) and managed deployment, attracting 700+ waitlist signups.

•Production Scheduling Optimization

June. 2024

Optimized company production schedules using Operations Research. [Link](#)

- Developed an optimization system using Python and Gurobi, projected to save millions by improving production efficiency.
- Formulated a MILP model; implemented Gurobi solver, heuristics, and a comprehensive system as deliverables.

•LLM Agents Enhanced INFEKTA

Aug. 2024

Agent-based epidemic model enhanced with an LLM cognitive framework.

- Integrated an LLM-based cognitive framework into the INFEKTA model, enabling agent learning and adaptation.
- Implemented an LLM system with memory and reflection based on cognitive models, enhancing agent behavior realism.

TECHNICAL SKILLS AND INTERESTS

Frameworks: Pytorch, Next.js, FastAPI, React, Hono, LangChain, iOS, DSPy

Tools: Docker, GitLab, Kubernetes, Nomad, Gurobi, Figma, Unity, Selenium, Azure, GCP, AWS

Coding Languages: C, C++, C#, Python, TypeScript, R, SQL

Soft Skills: Entrepreneurship, System thinking and Design thinking

Areas of Interest: Writing Technical Blogs
